6 Changes in the school population in secondary education

Part-time vocational secondary education

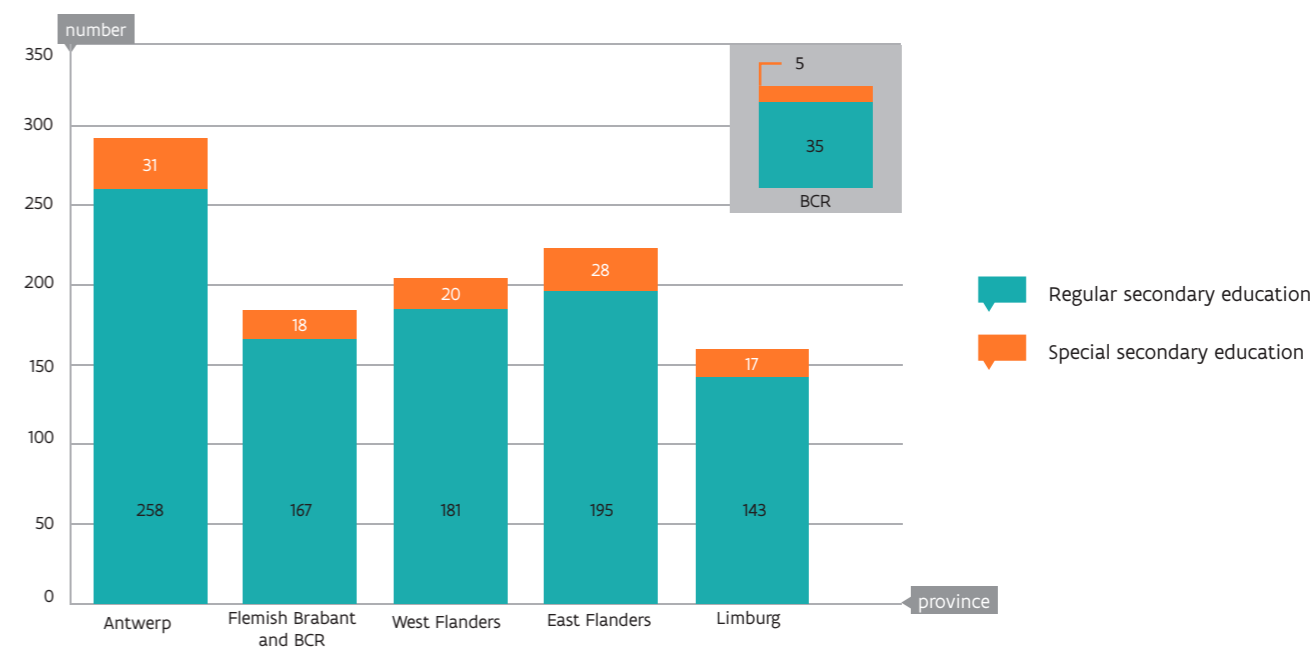

(1) The nursing courses at the 4th stage of vocational education became associate degree (HBO5) programmes in 2009-2010. These courses are allocated to the level of higher education. Associate degree courses can be organised by centres for adult education or by university colleges. The programme for the associate degree in nursing is the only exception: it is organised by institutions that organise full-time secondary education. These pupils are not taken into account.

Remark:

The above data are not yet final, as a number of applications are still under consideration for the school year 2014-2015. Due to this the number of allowances granted may increase further.

1 Number of registrations, enrolments and participants in 2014

	Number of registrations	Number of enrolments	Number of participants
Male	2,147	2,042	2,122
Female	1,690	1,616	1,751
Total	3,837	3,658	3,873

The figures above reflect the number of unique candidates who in 2014 were effectively enrolled in and paid for a course of study (enrolments) after they registered (registrations) at an information session. In 2014 there were 3.873 unique participants in at least one examination by the Examination Board of the Flemish Community (participants). This figure is higher than the number of enrolments because those candidates who enrolled for 2014 but did not yet graduate have been included in the figures.

2 Success rate by stage and type of secondary education in 2014

For 65% of all individual exams held by the Examination Board of the Flemish Community the candidate gained at least 50% of the marks. Subdivided according to type of education the success rate proved highest in vocational secondary education, followed by secondary education in the arts and technical secondary education. In general secondary education only slightly more than half of the candidates passed the examination.
