## Pupils

The number of pupils in elementary and secondary education in this publication refers to the number of pupils and students enrolled on February 1, 2010. For non-university tertiary education and university education the data refer to all active inscriptions in a diploma contract in an institution for higher education on 30 June 2010. A student can have several inscriptions. In adult education and part-time arts education enrolment rates are recorded. These rates may be higher than the number of physical persons as a pupil may be enrolled in several courses. The data concerning adult education refer to the period 1 April 2008 up to and including 31 March 2009.

In order to avoid double counts, the pupils enrolled in special education due to long-term illness (pupils in type 5 special education) are not included in the figures of special education (126 pupils in special nursery education, 197 pupils in special primary education and 333 pupils in special secondary education).

Pupils and students enrolled in French language schools or in French language sections of Dutch language schools coming under the authority of the Flemish authorities are not included in the figures either. Yet, for higher education, courses in other languages are included in the figures.

On 1 September 2009 2 new training forms are introduced in the Flemish educational system: the associate degree ('HBO') and advanced secondary education ('Se-n-Se'). In the Flemish qualification structure these training forms are allocated between secondary level and bachelor level. They do not form a separate education level. Legally advanced secondary education is allocated at the level of secondary level; associate degree is allocated at the level of higher education.

Advanced secondary education is organized by the institutions for full-time secondary education. The courses leading to an associate degree can be organised by centres for adult education and colleges for higher education. The only exception are the courses 'associate degree – nursing' (previously the fourth stage professional secondary education nursing) which can be organized by the institutions organising full-time secondary education.

Since the 2004-2005 academic year, Flemish tertiary education has been organising courses leading to Bachelor and Master degrees. In Flanders, Bachelor courses are professionally oriented or academically oriented. Academically oriented bachelor programmes are mainly intended to make students pass on to master courses. A professionally ori-

ented bachelor can take a master course after successful completion of a bridging programme.

The study volume of bachelor courses amounts to minimum 180 credits. The study volume of master courses amounts to minimum 60 credits. As from the 2005-2006 academic year, the traditional year system is replaced by a more flexible system of credits.

## Schools

A school is an institution which provides education and which is managed by one school head.

In continuing education, the term “centre for adult education” is used.

Institutions providing special education type 5 are not included in the figures (6 schools in special nursery education, 6 schools in special primary education and 4 schools in special secondary education).

## Staff

Staff statistics only register staff members either paid directly by the Education and Training policy domain or staff members whose salaries are covered by the block grant awarded to higher education. As a consequence, staff members benefiting from the pre-pension scheme (TBS55+) are included in the figures. Maintenance, technical and service staff in subsidised educational networks is not included. Subsidised contractual staff is not taken into account either, as these staff members are not fully paid by the Education and Training policy domain. Contractual staff in tenured posts is included in the figures.

Staff data on the 2009-2010 school year relate to January 2010, as known in June 2010. University staff data were provided by the Flemish Interuniversity Council (VLIR) and relate to February 1, 2009. Data on the 2009-2010 academic year were not available at the time of going to press of this publication.

As far as education staff is concerned, a distinction is made between managing and teaching staff on the one hand and other staff categories on the other. Managing staff consists of school heads and deputy heads. Teaching staff carries out a teaching assignment or benefiting from the pre-pension scheme. Other staff categories comprise administrative staff, manual staff of Community education, educational support staff, paramedic staff, staff of Pupil Guidance Centres, inspectorate staff, educational super-

vision staff, staff in boarding schools and child carers in nursery education. In elementary education, managing and teaching staff includes, as of the 2003-2004 school year, physical education teachers (in nursery education) and special care co-ordinators.

Numbers of staff members are expressed in physical persons. Physical persons are registered for the education level and education network where they carry out their main teaching assignment.

The number of staff members expressed in full-time equivalents is the sum of all partial assignments of all staff members (in other words including the replacements of less than one year). In colleges of higher education, teaching assignments of visiting professors and mandate fees are not included in the full-time equivalents. As for university education, figures on staff include visiting professors and early retired in terms of staff members, but not in the budgetary full-time equivalents.

From 1 September 2008 onwards, the staff members working in adult basic education are paid directly by the Education and Training policy domain. The Education and Training policy domain functions as 'third payer' for the staff members which have an employment contract with the adult basic education centre and who are not paid in another way; This 'third payer's scheme' has been introduced on the base of the decree on adult education (15 June 2007).

The courses 'associate degree-nursing' are organized by institutions that organize full-time secondary education. These data are estimations.

## Budget

The budget is expressed in terms of **available operating appropriations** which are estimated annually and entered into the (adjusted) expenditure budget of the Flemish authorities.

The operating appropriations comprise non-differentiated appropriations, differentiated commitment appropriations, variable appropriations, authorisations and additional appropriations of previous years, decreased by appropriations intended to cover the liquidation of commitments and by expenditure intended to cover debt load.

The term available appropriations means that these appropriations in addition to the appropriations mentioned above also comprise the share of overall provisions (mainly index and collective agreement) and reallocations of appropriations. Data for 2010 relate to the initial appropriations.

## General information

Certain cross-level expenses, of which the breakdown among the different levels is known, are allocated to the respective levels (amongst other things educational priority policy and investments). Without this adjustment one gets a distorted picture of the actual expenses per level. For 2010 the actual data are not available yet. Either the same breakdown as in 2009 or estimation was proposed.

Thus, these figures do not take account of the efforts paid by other (local) authorities, nor of the efforts paid by parents, schools and private companies.

The cost per pupil is calculated on the basis of the number of pupils eligible for funding. A pupil eligible for funding is a regularly registered pupil who gets a weighting factor on the grounds of certain criteria such as education level, course of study, origin, ... The number of pupils eligible for funding defines the size of the operating budget and the staff of each educational institution.

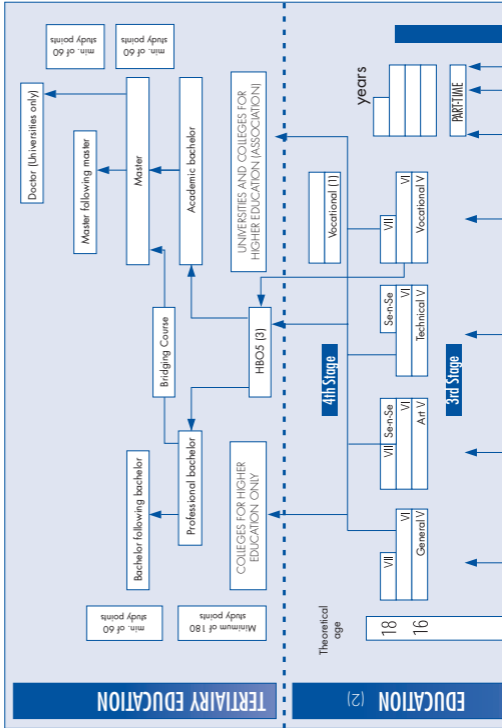

Amounts are expressed in thousands of euros, unless specified otherwise.

# STRUCTURE OF FLEMISH EDUCATION - SCHOOL YEAR 2009-2010

# General information

- (1) Everyone who succeeded in the second year of the third stage or passed an entrance exam, can enrol in the 4th stage of vocational education.
- (2) Modular education is not split up into stages and years and is therefore not included in this scheme.
- (3) The courses 'associate degree' (HBO5) can be organized by the centres for adult education but also by the colleges for higher education. The courses 'associate degree-nursing' are organized by institutions that organize full-time secondary education. The courses 'associate degree' are allocated at the level of higher education.

The courses nursing which were allocated at the 4th stage of vocational education are since 2009-2010 allocated at the courses 'associate degree' (HBO5). Courses 'associate degree' can be organized by the centres for adult education or by the colleges for higher education. The courses 'associate degree-nursing' is the only exception: these courses are organized by institutions that organize full-time secondary education. In 2009-2010 there were 5,271 students in associate degree-nursing. More information can be obtained in the chapters "Secondary education" and "Lifelong learning". In 2009-2010 HBO5 was not organized by the colleges for higher education.

(4)	4.35%	4.33%	4.28%	unknown	unknown	unknown
(5)	5.84%	5.94%	5.83%	unknown	unknown	unknown

(1) Not taking into account possible changes within the Flemish budget to and from the education budget.

(2) The increase of educational budget between 2008 and 2007, and the decrease of the education budget between 2009 and 2008,

can be explained by the pre-payment of the operation budget for elementary and secondary education for 2009.

(3) GRP (of Flanders) is expressed in genuine market prices.

(4) These percentages should not be confused with those used in international publications.

On an international level we use the OECD definition; where all expenditures towards educational institutions are taken into account. This includes not only the education budget, but also the expenditures of communities, expenditures SYNTRA, expenditures for research and development, the cost of the education department, child support for 18-25-year-olds, European means and pensions. The available series for Flanders are shown under (5).

In 2006 the Flemish ministry was reorganised (the BBB-operation), which aims to improve administrative management. From the financial year 2008 on the budget structure is brought in coherence with the new organisation. Due to this, the budget by level of education has been adapted. In order to keep a comparable evolution the data have been reviewed according to the new structure.

(1) Schools providing both nursery and primary education are included in the number of nursery schools as well as in the number of primary schools. As a consequence, the sum of the number of nursery schools and the number of primary schools is higher than the number of elementary schools. In the 2009-2010 school year there were 169 autonomous nursery schools, 176 autonomous primary schools and 1,976 elementary schools organizing both nursery and primary education in regular elementary education. In special elementary education, there were no autonomous nursery schools, 95 autonomous primary schools and 95 elementary schools organizing both nursery and primary education.

Besides these schools there were 6 schools organizing special education of type 5 (for pupils with long-term illness). They provide special nursery education as well as special primary education. These schools are not included in the data.

From the financial year 2008 on the budget structure is brought in coherence with the new organisation. Due to this, the budget by level of education has been adapted. In order to keep a comparable evolution the data have been reviewed according to the new structure.

(1) The budget integrated in the category 'not specified' refers mainly to the budget for in-service training.

(2) The increase of education budget between 2008 and 2007, and the decrease of the education budget between 2009 and 2008 can be explained by the pre-payment of the operation budget for elementary and secondary education for 2009.

(1) The reference 'not specified' (next to the data for regular and special secondary education) concerns mainly the budget for in-service training.

(2) The increase of education budget between 2008 and 2007, and the decrease of the education budget between 2009 and 2008, can be explained by the pre-payment of the operation budget for elementary and secondary education for 2009.

From the financial year 2008 on the budget structure is brought in coherence with the new organisation. Due to this, the budget by level of education has been adapted. In order to keep a comparable evolution the data have been reviewed according to the new structure.

Due to the new budget structure 2008 and the new Decree on tertiary education, it is no longer possible to make a subdivision in the budget for colleges for higher education and universities.

The increase in the investment budget in 2008 can mainly be explained by the additional resources for the renovation of the infrastructure of the University Hospital Ghent.

From the financial year 2008 on the budget structure is brought in coherence with the new organisation. Due to this, the budget by level of education has been adapted. In order to keep a comparable evolution the data have been reviewed according to the new structure. The budget for adult education takes into account the former budgets for social advancement education, adult basic education, BIS but also the budget for Dutch as a second language and the University Language Centres in the provision of needs of non-Dutch speakers.
