

VLAAMSE BANKEN
FROM GRAVELINES TO OOSTKAPELLE

DEPTHS IN METRES
(SCALE 1:100 000 (1:100))

Depths are in metres, which is the unit of
lowest astronomical tide in the North Sea.
Approximate data for UK waters and areas
covered by French surveys and local
charts for coastal waters.

Height is in metres. Underlined figures are
sounding heights above Chart Datum. All other
heights are above Mean Sea Level.

Headlines are referred to ADMSA Datum.

Navigation Marks: IALA Maritime Buoyage
System - Region A (red in port).

Projections: Mercator.

Source: Derived from the hydrographic
information shown in the Source Diagram.
