Reproduction of data from this publication is allowed provided the full acknowledgment is displayed: "MCS - Coastal Division - Flemish Hydrography".

This is a free translation of the official "Berichten aan Zeevarenden, nr. 2025-14"
In case of dispute the Dutch text is the only valid copy.

Positions:

are given in the reference system World Geodetic System 84 (WGS84). Incorrect interpretation of the reference system can lead to errors in the position of several hundred of metres.

Depths (in metres):

are reduced to Lowest Astronomical Tide (LAT) for tidal areas and to local dock datum for non-tidal areas.

Heights (in metres):

drying heights are above LAT. Vertical clearance is above Mean High Water Spring (MHWS). Other heights are above Mean Sea Level (MSL). Heights for non-tidal areas are above local dock datum.

Directions, bearings, leading lines and light sectors (in degrees):

are true reckoned from seawards.
