In case of dispute the Dutch text is the only valid copy.

Positions:

are given in the reference system World Geodetic System 84 (WGS84). Incorrect interpretation of the reference system can lead to errors in the position of several hundred of metres.

Depths (in metres):

are reduced to Approximate Lowest Astronomical Tide (ALAT) for tidal areas and to local dock datum for non-tidal areas.

Heights (in metres):

drying heights are above ALAT. Vertical clearance is above Mean High Water Spring (MHWS). Other heights are above Mean Sea Level (MSL). Heights for non-tidal areas are above local dock datum.

Directions, bearings, leading lines and light sectors (in degrees):

are true reckoned from seawards.
